

AMENDMENTS TO THE SPECIFICATION

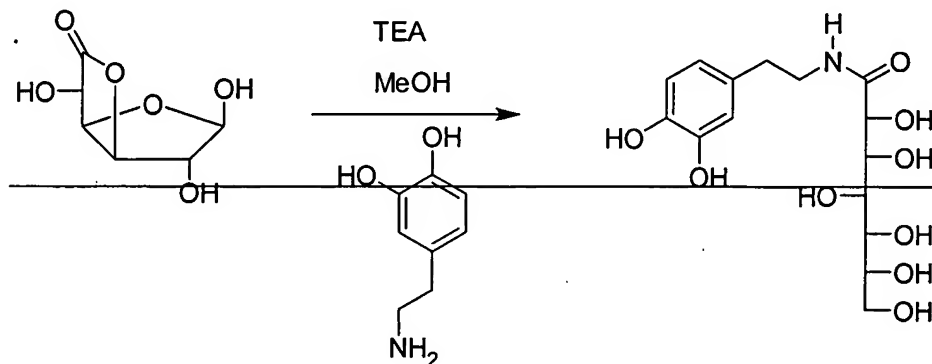

In amendments to the specification, additions are represented by underlining and deletions are represented by ~~striketrough~~ or, in cases of five characters or fewer, by [[double brackets]].

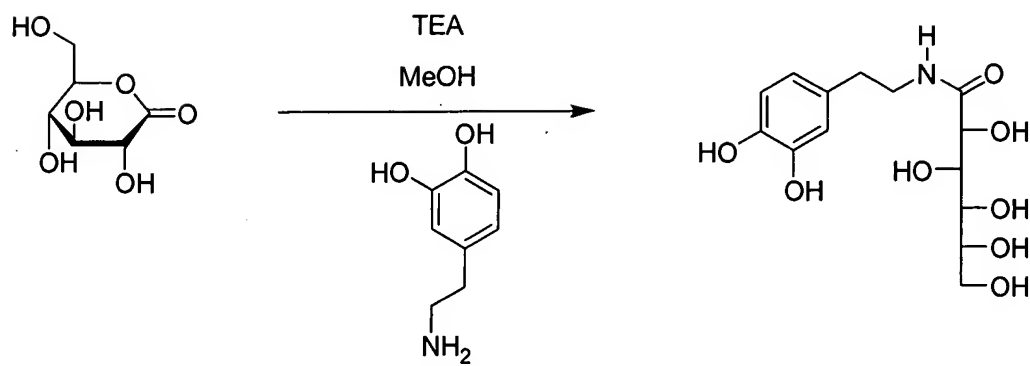

Please replace the paragraph on page 26, lines 15-17, with the following paragraph:

-- "Halogen" is intended to mean a fluorine, chlorine, or bromine, ~~or sulfur~~ atom or ion or group. Preferred halogens groups are chlorine and bromine, ~~bromine, thiol and sulfonyl and most preferred, chlorine.~~ The most preferred is chlorine. In certain embodiments, it is understood that a sulfur-containing group (e.g., a thiol group or a sulfonyl group) can be used in place of a halogen. --

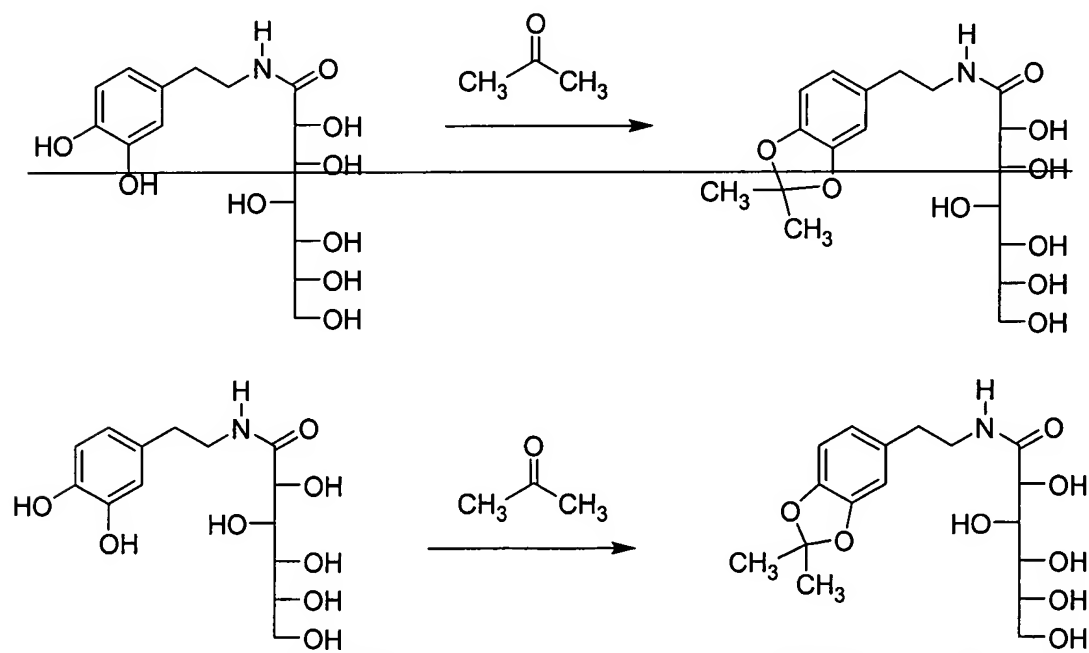

Please replace scheme 1 on page 46 with the following scheme:

--

Please replace scheme 2 on page 46 with the following scheme:

Please replace scheme 3 on page 47 with the following scheme:
